Continuation of Substance of Interview including description of the general nature of what was discussed: Examiner's position is that non-POSS claims remain unpatentable over Dombrowski in view of Kamura et al. given disclosure that metal having claimed porosity has advantages for vaporization of impregnated amphiphilic compounds. However, POSS claims are patentable for the reasons stated in the attached reasons for allowance. Applicants agreed to advance prosecution of the case by canceling claims 1-11 and 26-30 without prejudice, leaving only allowable claims 21-25, 31, and 32 to place the application in condition for allowance .
